

LEGs Interested in Collaborating with other LEGs

LEG Name	Interested Members and Topics
City of Lakes	Some members have interest in opioid tapering schedules and have expressed interest in researching this topic.
Family Medicine LEG - Sudbury	One member is interested in collaborating on projects that look at how to teach clinical reasoning. Our LEG in general is interested in collaborating with other family physicians, specialists, and allied health professionals to increase the knowledge base of our LEG in order to become better physicians and teachers. We have taken steps to work more closely with the City of Lakes FM LEG on a couple of initiatives and have invited various outside speakers to present at our Journal Club and North of 44 Workshop.
Huntsville Physicians	Our LEG would be interested in collaborating with other LEGS in ongoing research projects. Other LEGS could contact our Research Coordinator, Lisa Allen @ lisa.allen@mahc.ca with any requests.
Manitoulin Island Clinical Teachers Association	Our LEG is interested and enthused to collaborate with other LEGs on research and scholarly projects. Topics of local interest include: rural obstetrics, palliative care, premature deaths in rural communities, realities of rural healthcare, Indigenous health, geriatrics, emergency medicine, diagnostic error, social issues, long-term care, patient & family engagement, hospital readmissions, health literacy, diet & lifestyle, public health & prevention, physician & locum recruitment.
Marathon Family Health Team	Our LEG is interested. One of the projects being rolled out is an opioid management tool using drug screening that is linked to the EMR using the OCEAN software. This project is looking for other clinic partners to help implementation and support a large study on effectiveness.
North Bay Paediatric Group	Our leg would consider participating in pediatric specific research projects with other LEGs.
Northern Orthopaedics (N.ORTH)	Our LEG is interested in continued collaboration with other LEGs. I.e.- TJA satisfaction, pain and functional outcomes Indigenous population, distance-bases outcomes, sarcoma, visual feedback post-TJA
Sault Ste Marie Academic Medical Association	Research collaboration interests will be developed with our new Research Coordinator in the coming months.
South Muskoka	Our LEG would be interested in collaborating with other LEGS in ongoing research projects. Other LEGS could contact our Research Coordinator, Lisa Allen @ lisa.allen@mahc.ca with any requests.
South Temiskaming	Our LEG is very interested in collaborating with other LEGs in research including sharing human and financial resources. Particular interests include quality improvement in the Emergency department and in Obstetrics, impact of simulation on performance, medical education in the community including secondary school, and using feedback to improve performance.
Sudbury Anaesthesia	Our LEG would be interested in studying and improving patient post-operative pain management.
Sudbury Emergency	Our LEG is very interested in collaborative research projects to improve care delivery in the Emergency Department. This can include anything from opioid use, use of rapid access internal medicine clinics, development of standardized protocols or clinical tools for mental health patients, developing resources for addictions services, etc.
Sudbury Paediatric	Our LEG is interested in research surrounding any pediatric-related issues!
Sudbury Psychiatry	We are currently reviewing research opportunities to collaborate with other LEGs.
Thunder Bay Internal Medicine	There are other research projects ongoing unfortunately I have not received the information from my colleagues at this time.
Thunder Bay Psychiatry	Our LEG initiated and funded summer student projects with primary care and emergency services this year. There are discussions of collaborating across LEGs on opiate use, meeting MH needs of underserved populations.
Timiskaming-Cochrane	Our LEG is very interested in collaborating with other LEGS in research projects focusing in chronic pain and opioid use, and other topics as desired.
Timmins Educators and Mentors (TEAM) Physicians	We would partner with small communities along the highway 11 corridor Kap-->Kirkland Lake to develop a SIM LAB at Northern College. They already have very good Sim Models and just need to develop a program for education.
