Qualtrics Summary

NORTHERN ONTARIO
ACADEMIC MEDICINE
ASSOCIATION

LEG Annual Report Comparative Highlights

The Northern Ontario Academic Medicine Association (NOAMA) Academic Funding Plan (AFP) is intended to increase the capacity of physicians to provide clinical services and academic activities in an integrated manner.

To foster this culture, Local Education Groups (LEGs), consisting of physician members, have been set up across Northern Ontario. A LEG is a group of physician clinical faculty who have joined together to assume responsibility for the provision of a significant, identifiable component(s) of the Northern Ontario School of Medicine's (NOSM) current academic mandate.

The NOAMA Board has implemented the distribution of funding for scholarly activities through a LEG Funding Formula. NOAMA has used Qualtrics to capture the academic activities occurring across Northern Ontario.

The Qualtrics Platform assists in collecting and reporting data on physician activity to ensure our AFP mandate is fulfilled, and develop coalitions across health care in Northern Ontario. The framework for the LEGs includes a program logic model outlining LEG activities and indicators.

The reporting platform has allowed NOAMA to capture scholarly activity, research and innovation, and professional development (PD) within each LEG. The following tables illustrate the year over year (2018, 2019, 2020) cumulative summary of inputs collected through the reporting platform.

Develop Research Capacity

Develop and participate in LEG research networks and/or regional collaboration

Increase documented clinical innovation/quality improvement activities

Conduct community engaged scholarships and increase funded research conducted by LEG members

Develop Physician Leaders

Faculty Development

2021 Variable Funding Distribution in LEGs

Variable Funding: Enhanced Scholarly Activity and Research

Based on input from the LEGs and the results of the CRaNHr LEG evaluation, NOAMA will continue to support LEGs in the activities related to planning, development, and establishment of support infrastructure related to enhanced scholarly activity and research.

There is \$1,030,000 available for distribution. The amount will be a distribution to the interested LEGs based on membership. A minimum of \$10,000 and a maximum of \$100,000 will be applied to determine the funding distribution to the LEG. To receive this funding, LEGs must sign off and return the LEG Variable Funding Accountability Report.

**Added in 2020*

DEFINING SCHOLARLY ACTIVITY

In Northern Ontario, we broadly define Scholarly Activity as the pursuit of medical knowledge (including medical education knowledge) to improve the health of those in our Northern Ontario communities. Typically this pursuit would be related to the individual's area of medicine or expertise with the intention to benefit the community through personal or learner achievements.

Scholarly Activity occurs within the context of our clinical, academic and governance structures, where the focus of our endeavors is our social accountability and community engagement. A range of activities can be systematically undertaken to substantiate our efforts to gain a holistic understanding. These activities include the discovery, integration, application and dissemination of knowledge (Boyer 1990).

The quality of our scholarly work can be assessed in terms of

- the clarity of the goal;
- the adequacy of preparation;
- the soundness of methodology;
- the consideration of ethical issues;
- the impact of the findings;
- the clarity of communication of those findings; and
- the critical reflection upon the work done to prepare for future work (Glassick 2000).

Within our Distributed Model of Community-Engaged Medical Education at NOSM, we encourage grassroots discovery, innovation and programs relevant to Northern Ontario communities. While we will utilize Boyer's (1990) categories of Scholarly Activity or Scholarship, we are not restricted to these definitions.

Discovery - Advancing Knowledge (Research)		Integration - Synthesizing Knowledge Across Disciplines		Application - Applying Existing Knowledge (Theory to Practice)		Teaching - Disseminating Medical Knowledge	
Case-Based Learnings	42	Case Studies	33	Creation of New Clinical Programs	24	Clinical Medical Learner Teaching or Other Clinical Teaching	47
Creation of Research Related Positions	15	Chart Audits	30	Curriculum Development	32	Clinical Skills Lead	27
Ethics Courses	8	Community Education Events	32	Develop and/or Deliver EBM Faculty Development	19	Community Lectures	17
Grand Rounds	33	Critical Incident Review	32	Developing E-Platform Sessions	8	Co-op Programs	6
Journal Clubs	33	Infectious Control Committees	22	Faculty Development Workshops	28	Education Sessions (S.E.S.)	30
Medical Staff Rounds	40	Leadership Coaching	19	Order Set Development	27	Local Credentialed Courses (ACLS PALS)	22
Participation in Quality / Patient Safety Committees	33	M&M Rounds	35	Program Development	28	Mentoring Undergraduate University Learners	29
Research Projects	38	MCCs	15	Quality Improvement Projects	36	Presenting Research Outcomes	22
Student Supervision	46	Occupational Health Committees	13	Review Accreditation of CEPD Events	16	RATS Sessions / Development	6
Theoretical Thought Project	3	P.A.R.T.Y. (Prevent Alcohol and Risk Related Trauma in Youth) Programs	3	PBL	28	TED Talks	3
	0	Participating in Planning Committees for Educational Events	34	Journal Clubs / Reviews	29	Teleconference lectures	30
